

github actions

Set your workflow to run every day of the week from Monday to Friday at 2:00 UTC

on:
schedule:
- cron: "0 2 * * 1-5"

Your GitHub Actions workflow is correctly configured.

 YAML

```
on:  
  schedule:  
    - cron: "0 2 * * 1-5"
```

Cron expression breakdown

0 2 * * 1-5

				└─	Day of week (1-5 = Monday to Friday)
			└─	Month (* = every month)	
		└─	Day of month (* = every day)		
	└─	Hour (2 = 02:00 UTC)			
└─	Minute (0)				

This means:

- Minute: 0
- Hour: 2 (02:00 UTC)
- Day of Month: * (every day)
- Month: * (every month)
- Day of Week: 1-5 (Monday through Friday)

Complete workflow example

 YAML

```
name: Weekday Scheduled Workflow
```

```
on:
  schedule:
    - cron: "0 2 * * 1-5"

jobs:
  run-job:
    runs-on: ubuntu-latest

    steps:
      - name: Checkout repository
        uses: actions/checkout@v4

      - name: Run script
        run: echo "Running every Monday-Friday at 02:00 UTC"
```

Notes

- GitHub Actions uses **UTC** for cron schedules.
- Scheduled workflows only run on the **default branch**.
- There can be a slight delay (a few minutes) due to GitHub's scheduling infrastructure.
- If you also want to trigger the workflow manually, add:

YAML

```
on:
  workflow_dispatch:
  schedule:
    - cron: "0 2 * * 1-5"
```

This allows the workflow to run both **automatically on weekdays at 02:00 UTC** and **manually from the GitHub Actions UI**.
